

Success story of Musim Mas achieving 100% RSPO Certification in Indonesia

Dr Gan Lian Tiong, Musim Mas Group Head of Sustainability

This presentation summarises the effort made by Musim Mas Group to produce sustainable palm oil in the plantations it manages.

Amongst the Group's achievements are becoming the first in Indonesia to achieve RSPO certification in two palm oil mills in Riau on 6th January 2009 and in its West Sumatra scheme smallholders on 11th June 2010.

All of its scheme smallholders were certified by 2nd March 2011. The last management unit received its RSPO certificate on 4th September 2012.

Apart from independent mills and new land developments and new acquisitions, all of which subscribe to the RSPO New Planting Procedures, all palm oil mills with directly managed estates and scheme smallholders are now RSPO certified.

These achievements are the culmination of the Group's pursuit of its core value - Managing for Sustainability - and the careful implementation of sustainability strategies and practices. A key factor is that all employees subscribe to the view that sustainability is everyone's responsibility and this drives the push for 100 % sustainability.
