10 Years Of Driving Sustainability.
A Business Model For The Future.

Agenda

1. RSPO eTrace: Facts & Figures
2. Credible Supply Chain
3. RSPO business rules incorporated in eTrace
4. Current process to start/continue trading IP/SG/MB
5. RSPO eTrace next steps: CB area
6. Future process to start/continue trading IP/SG/MB
7. To summarize

10 Years Of Driving Sustainability.
A Business Model For The Future.

RSPO eTrace: Facts & Figures

- RSPO eTrace is the improved traceability system for administrating the physical trade of Certified Sustainable Palm Oil (CSPO).
- The purpose of RSPO eTrace is to serve the vision of RSPO in transforming markets to make sustainable palm oil the norm.
- The business rules embedded in the P&C and SCC standards are incorporated in RSPO eTrace.

10 Years Of Driving Sustainability.
A Business Model For The Future.

RSPO eTrace: Facts & Figures Launch date July 23, 2012

RSPO eTrace: Facts & Figures

Active members

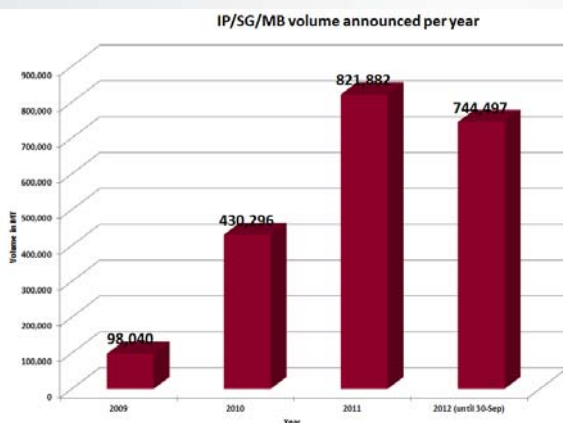

- 196 RSPO members active in eTrace

RSPO eTrace: Facts & Figures

CSPO Sales through IP/SG/MB

- Total physical sales since 2008 = **2,094,715 MT**
- Since the launch eTrace 275,000 MT traded, mainly as SG

Credible supply chain

Three essential components that need to collaborate for a credible supply chain.

1. P&C/SCC Certification
2. Administration (eTrace & GreenPalm)
3. Annual Surveillance Audit

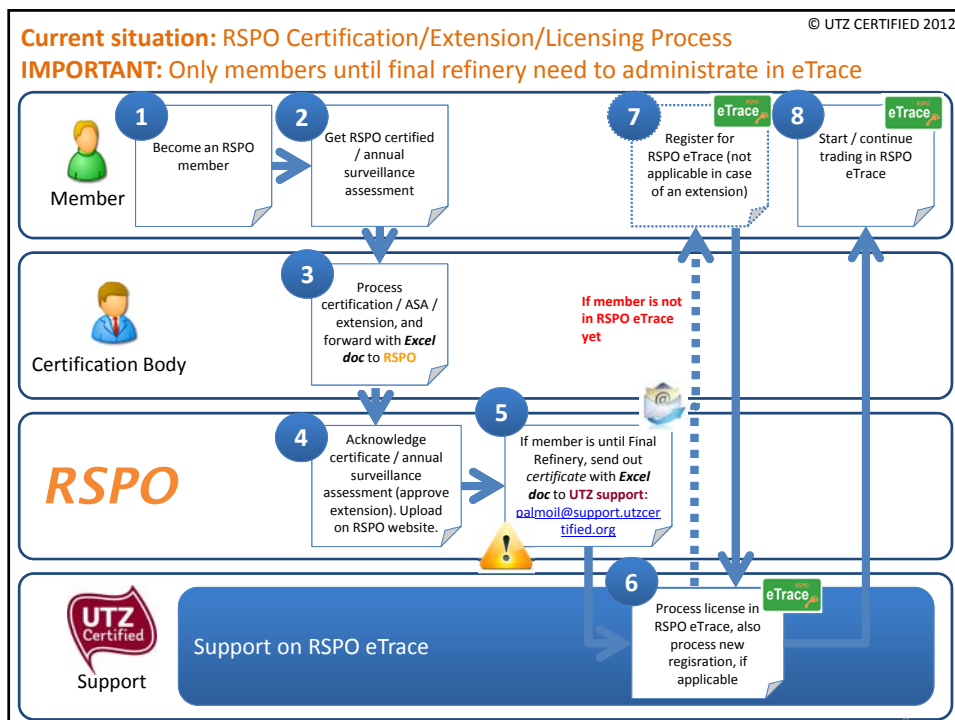

10 Years Of Driving Sustainability.
A Business Model For The Future.

RSPO business Rules incorporated in eTrace

- Certification is for 5 years, but a license is **365 days** following the Annual Surveillance Audit process
- In order to administrate transaction in the system both seller and buyer must have a **valid license**, granted after certification.
- Only those **products** mentioned in P&C and SCC standards can be administrated in eTrace – except for PKO
- Stock positions in eTrace should **reflect reality** as much as possible
- The final refinery should **“trace”** the product, when selling CSPO onwards
- Product **Conversions** are done according SCC standards
- Members can trade products equal to or lower than the **program level** they are certified for.
- **Start your certification process on time! Make sure your surveillance assessment documents are submitted to palmoil@support.utzcertified.org before your current license expires!**

RSPO eTrace next steps CB area

WHAT IS THE CB AREA?

- **Dedicated area for CB's** in RSPO eTrace in order to process a.o. new certificates, annual surveillance assessment documents, and extensions.

WHY THE CB AREA?

- It will **simplify** the approval process and shorten communication lines between RSPO, CB's and UTZ Certified Support team.
- Hence it **reduces time** of certification approval process.
- All relevant certification documents are captured on **one central location**.
- To facilitate administration of time (and volume) **extensions**.

Section 1 - Type of Member and Activities | Member: UTZ Migration Mill Expand All | Collapse All

Select the type of Certificate Holder:

* Select the type of Certificate Holder : Individual Group Multi-site Multi-group

Role of Certificate Holder

* Does the Certificate Holder produce certified products? Yes No

* Does the Certificate Holder process its own produce? Yes No

* Does the Certificate Holder trade certified products (both purchase and sell)? Yes No

* Does the Certificate Holder process for other Certificate Holders and/or products purchased from other members? Yes No

Produced Products

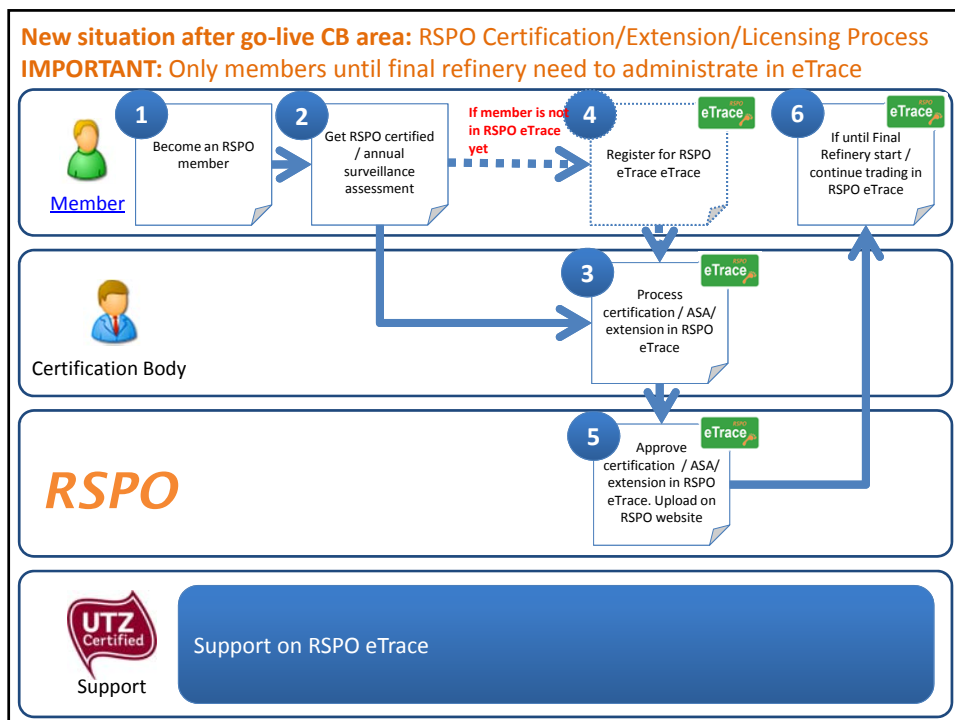

Select the product(s), program level and volume that are produced by Certificate Holder (Principle and Criteria).

Please note that if the Certificate Holder performs an activity on its harvest, the volume on the Certificate should reflect the final product.
Example: If a member performs Refining on CPO the result is Refined Palm.

Please enter details below :

Product
CPO- Program Level: IP- Certificate Volume: 100,000 MT- Carry Over: 0 MT

Cancel **Save Section**

To summarize

- Certification information gathered in **one central location: eTrace**
- **Simple** overview of all your RSPO certified customers
- **Efficient** communication and approval process, reduces time
- Email **notification** on (future) expirations
- To facilitate administration of time (and volume) **extensions**

*Including the CB area in RSPO eTrace, supports a **credible supply chain**, and therewith serves the vision of RSPO in transforming markets to make **sustainable palm oil the norm**.*
